ABOUT

Data Analyst specialized in Power BI, SQL, and DAX.

I have been working professionally with Power BI, SQL, and DAX since 2023, developing solutions, demonstrating results, and making forecasts in the marble/granite and retail sectors.

I have a deep understanding of UX/UI principles, ETL, and Python, and I am highly committed to the quality and usability of reports. I focus on identifying true needs and delivering more than just a simple digital report.

I take great pride in creating efficient reports, always focused on serving the company's departments

Achievements:
• Worked professionally with Power BI and SQL for 2 years, developing solutions, demonstrating results, and making forecasts in the marble/granite and retail sectors.

• Main technologies include Power BI, SQL, ETL, Python, Excel.

• Currently working as a Data Analyst at Redsis.

• Interpersonal skills are highlighted as a helpful professional, always ready to collaborate with colleagues. Detail-oriented, excelling at problem-solving, prioritizing data quality, quick to learn, and creative.

• Notable achievements include over 20 companies with significant results.
